

Blockchain analysis of the origin of funds in account **APL-4C7Y-7JEQ-ZBV7-55T2A**:

Below is a list of the "private" transactions on the Apollo blockchain, between block height 1881027 and 1881334. Account **APL-U3PY-GGX5-CB6R-5GBZ9** has sent a total of 1,000,050 APL in two transactions to two mixer accounts. After multiple split and combine transactions, all in bold, the funds end up in account **APL-4C7Y-7JEQ-ZBV7-55T2A**:  
 $74996.70+39996.84+134994.46+67500.41+67500.41+135005.82+412521.95+67499.41 = 1,000,016$  APL, with 34 APL spent on fees along the way.

NO MORE FUD, lets clear the air!  
Apollo Currency has some of best, if not...  
the best privacy on the market, 2sec blocks  
(soon sub second), DEX and Sharding being  
rolled out as i post!  
Here's a challenge for anyone who believes  
the lies that Apollos transactions are  
transparent.

As of late, a number of publishers like CCN and Bitcoin Exchange Guide have allowed articles to be published on their sites falsifying claims that "Apollos blockchain may not be as private as they claim", words taken from a disgruntled company Jelurida. So I have a challenge for any person wanting to prove this technology as a fraud. In fact I DARE YOU!  
The following Apollo wallet address contains 1 million Apollo (worth approx. \$2000 USD at time of writing), these are my personal Apollo coins, tell me what wallet these funds were transferred from and show me proof, and these coins are yours! You have 7days before I transfer these back to my Apollo vault wallet, Apollos most secure wallet. Time is tickin....
